

Gordon Hammes *Biochemistry* Scholar Award

The Gordon Hammes Scholar Award honors the young scientists responsible for the very best papers published in Biochemistry. Established in 2017 and awarded alongside the Gordon Hammes Lectureship Award, the Scholar Award seeks to recognize those at the bench – graduate students, postdocs, and undergraduates – for the outstanding work they do. Awardees must be graduate students or postdoctoral scientists who are first authors (or co-first authors) on a paper published in Biochemistry.

2017	<i>Iga Kucharska</i>
2018	<i>Timothy Bumpus</i>
2019	<i>Kathleen Leamy</i>
2020	<i>Can Araman</i>
